CONTAINER FIRE SIMULATOR ST/ST-PRO

Versatile. Hands-On.
Live Fire & Search and Rescue Training.

Symtech's Container Fire Simulator ST and ST-PRO deliver unparalleled ruggedness and durability. Our interior layouts provide varied scenarios and attack angles and do not resemble typical container interiors. Training units are expandable over time and they are relocatable. All openings are fully reinforced with our heavy-duty steel framing system and include flashing for a clean finish. Premium features such as grated roof working decks, steel non-skid floors, and our 2,300° F thermal lining system ensure your investment stands the test of time.

Live fire and non-burn units are available. Fires can be fueled by Class "A" Propane or Natural Gas. Our 70,000 cfm Smoke Generation System ensures maximum obscuration for search and rescue training. All training units are fully compliant with NFPA 1402 and OSHA guidelines. Standard and fully custom designs are available and an extensive options list is available upon request.
