

40-FT ROADWAY TANKER ST/ST-PRO

Versatile. Hands-On. Live Fire & Hazmat Training.

Symtech's 40-ft Roadway Tanker ST and ST-PRO deliver unparalleled design elegance, ease of setup, and durability. The Tanker includes multiple Live Fires, Leak Simulations, and Smoke (optional) all controlled at the push of a button with the included Wireless Remote. The Tanker includes interchangeable double-walled steel jackets to simulate a variety of flammable liquid leaks. Rooftop mounted Chlorine and MC-306/DOT-406 domes provide additional training opportunities. All leaks are created using a varied combination of compressed air and/or water.

Fires are fueled by environmentally friendly propane. The Tanker provides three fully independent fires including Tank Top/Relief Fires, Flange Fires, and Fuel Spill Fires. Symtech's multi-stage flame control ensures varied scenarios and maximum realism with progression from vapor to liquid fires in one touch. Fires include pilot confirmation for NFPA compliance and the safest training possible.
