Symtech

Vital. Hands-On.
Fire Behavior & Fire Suppression Training.

Symtech's Flashover Simulator ST and ST-PRO deliver unparalleled ruggedness and durability. Both units are available in Fixed or Mobile configurations. They deliver critical fire behavior and fire suppression training safely in a repeatable manner. All openings are fully reinforced with our heavy-duty steel framing system and include flashing for a clean finish. Premium features such as our 2,300° F thermal lining system ensure your investment stands the test of time.

The ST model may be Fixed or permanently mounted on a trailer making it Mobile. The ST-PRO design includes next generation features for improved training, efficiency, realism, wand safety.

Fires are fueled by Class "A" materials. All training units are fully compliant with NFPA 1402 and OSHA guidelines. Symtech includes on-site assembly for Fixed units.

A Train-the-Trainer Program is included for all units.
