

HOSE LINE FIRE SIMULATOR ST

Versatile. Hands-On. Hose Line & Fire Extinguisher Training.

Symtech's Hose Line Fire Simulator ST delivers unparalleled training value, ease of setup, and durability. On its own, the Simulator provides intense hose line and fire extinguisher training. Pair it with any one of more than a dozen optional training props and the possibilities are endless.

The Hose Line Fire Simulator ST is constructed of high-quality, 304 stainless steel. Its water-cooled design ensures maximum longevity for your investment. The simulator includes all required supply hoses, covers, and a power cable.

Fire areas are fueled by environmentally friendly propane and are initiated at the push of a button with the included Wireless remote.

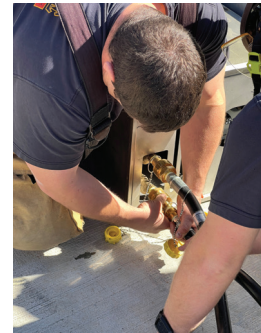

Symtech's multi-stage flame control ensures varied scenarios and maximum realism with progression from vapor to liquid fires in one touch. Fires include pilot confirmation for NFPA compliance and the safest training possible.
