Symtech

Versatile. Hands-On. Turnkey.
Mobile Live Fire & Search and Rescue.

Symtech's Mobile Fire Simulator ST, ST-PRO, and ST-PRO Advanced deliver unparalleled ruggedness and durability. Our simulators are built on a DOT-compliant custom trailer chassis. They provide turnkey training with power generator and on-board fuel storage included. All openings are fully reinforced with our heavy-duty steel framing system and include flashing for a clean finish. Premium features such as grated working decks, steel non-skid floors, and our 2,300° F thermal lining system ensure your investment stands the test of time.

Standard equipment includes LPG fires, movable walls, pitched roof/ventilation prop, basement staircase, two training doors, two training windows, and more. Our 70,000 cfm Smoke Generation System ensures maximum obscuration for search and rescue training. All training units are fully compliant with NFPA 1402 and OSHA guidelines. Standard and fully custom designs are available. An extensive options list is available upon request.
