

## OUTDOOR & INDUSTRIAL FIRE SIMULATOR ST-PRO

### Intense. Reliable. Safe. Outdoor & Industrial Live Fire Training.

Symtech's Fixed Outdoor & Industrial Fire Simulator ST-PRO is designed for agencies with the highest trainee throughput and turnover. Our fixed prop designs with fully integrated burners provide the most robust training solution available with maximum instructor control. Fires are fueled by environmentally friendly propane and are initiated at the push of a button from the Operator Control Station or with the included Wireless Remote. Symtech's highly reliable ionization

method for pilot proving ensures fires ignite every time without the risk of dumping raw fuel.

Symtech's multi-stage flame control ensures varied scenarios and maximum realism. Optional 70,000 cfm smoke generation can enhance training exercises.

Fire Simulator ST-PRO systems are fully compliant with NFPA 1402. Symtech can custom design a prop to meet your needs.

#### Example Props include:

- LPG Tank Prop
- Christmas Tree (Xmas) Prop
- Propane Cylinder Prop
- Dumpster Fire Prop
- Paint Locker Prop
- Forklift Prop
- Split Flange Prop
