VEHICLE FIRE SIMULATOR ST/ST-PRO

Versatile. Hands-On.
Live Fire & Extrication Training.

Symtech's Vehicle Fire Simulator ST and Fire Simulator ST-PRO deliver unparalleled training value, ease of setup, and durability. Pair the ST Model with the Hose Line Fire Simulator ST to create varied training scenarios by simply relocating the Pan or Vehicle Prop. Or, "go PRO" with the Vehicle Fire Simulator ST-PRO, featuring multiple integrated, independently controlled fires. Workable hood, doors, trunk and foldable seats are standard in all models. Fires are initiated at the push of a button with the included Wireless Remote.

Fires are fueled by environmentally friendly propane. The ST Model provides Engine,

Passenger Compartment, Trunk and Ground/Fuel Spill Fires. The ST-PRO Model provides independent Engine, Forward Passenger, Rear Passenger, Trunk, and Fuel Tank Fires, while also incorporating Smoke, Sound, and Extrication features. Symtech's multi-stage flame control ensures varied scenarios and maximum realism with progression from vapor to liquid fires in one touch. Fires include pilot confirmation for NFPA compliance and the safest training possible.

Optional extrication, rescue, and forcible entry features are available to enhance training and for situations where obtaining and disposing of junked cars is challenging.
